Abstract: Juvenile delinquency is the rapidly growing problem in Bangladesh, however, to address this problem there are a little attention in both government and NGO sector. This is a small step to discover the problem. We used qualitative case study method and focus group discussion to identify the most common nature of the juvenile delinquency and its extent. In this study, we revealed number of interrelated reason to escalate juvenile delinquency in Bangladesh. First of all, dysfunctional family relationship has been seen as a major reason to involve in delinquency. The second most reason is poverty which inter-related with the dysfunctional family. In addition to that, availability of drug is seen one of the important cause of linking with defecting path. Furthermore, influences of peer group are another driver of involving with juvenile delinquency.

Introduction:

Delinquency refers to behavior by youths under 18 years of the age which is not acceptable to society and is generally regarded as calling for some kind of admonishment, punishment, or corrective action. Delinquency has become a cause for national concern not only on our own society but in most modern countries throughout the world. Due to industrialization the growing number of children is involving with the criminal

activities which really matter of great concern for every nation specially developing country like Bangladesh. There is no doubt Juvenile Development Centre is playing a crucial role to shape up the younger and future generation of our country. The general objective of this study is to understand the nature of juvenile delinquency in context of Bangladesh and the specific objectives of the study are: to know the socioeconomic and demographic profile of respondents, identify the causes of
